

QUALITY, H & S, AND ENVIRONMENTAL POLICY

As a waste company engaged in the collection and disposal of commercial waste for the retail trade, commercial, and private customers, our main objective through the nature of the business being a positive aspect, is to control and prevent pollution, and minimize risks to personnel, through the efficient transport and handling of customers waste for final disposal at approved disposal sites.

We will maintain, adherence to applicable legal requirements and other requirements to which the company subscribes, OH&S legislation and regulations, and will maintain dialogue with the respective authorities in this regard. Our aim will be to strive for continual improvement through the review of our quality, environmental, and OH&S objectives and targets, and purposeful evaluation of our processes in order to prevent pollution, and to minimize risks. We are committed to complying with customer, statutory and regulatory requirements, and will continually improve the effectiveness of the integrated management system. The system will be reviewed at appropriate intervals, which will provide the framework for the setting and review of quality, environmental, and OH&S objectives, and targets.

Our policy is to offer the most competitive, professional, and efficient service consistent with costs, and to ensure that the company's organisational goals and objectives are met in line with the customer's needs and expectations. We recognise the implications of the requirements as specified in the various regulations to which we operate, we will ensure that the operations carried out comply with the above.

In order to meet the requirements of the above regulations, and the needs and expectations of our customers in a cost-effective manner, the company will operate a system dedicated to the "Right First time Approach". It is a prime requirement of our approach to quality, environmental, and OH&S issues that each person including those who work for or on behalf of the company recognises and accepts the company philosophy and accepts the responsibility for the quality of his/her own output, and the environmental implications of their activities.

To facilitate and ensure such success, our system of operation has been defined in the system manual and its supporting procedures, compiled around the requirements of BS EN ISO 9001: 2000, BS EN ISO 14001: 2004, and OHSAS 18001: 2007. The requirements as specified in the above system are expected of all personnel working for or on behalf of the company.

Signed
