

B&M Waste Services

Carbon Neutral Waste Management

B&M Waste Services is a local, carbon neutral, family-run company offering a recycling-led waste management service, tailored to your individual needs.

B&M Waste offers value for money service through recycling and recovery rather than landfill.

With an ultimate goal of 'zero to landfill', we focus on segregating your waste where viable so your business can benefit from both carbon and cost savings.

We're highly accredited, multi-award winning and our approach is transparent and tailored to the individual company we work for.

We send our customers monthly recycling reports so their reduced impact on the environment can be monitored.

We also offer Hazardous Waste disposal services, including WEEE disposal, and Secure Data Destruction with B&M Secure Shredding.

We save our customers money through recycling rather than landfill.

Don't be just a number, be a B&M Waste Customer, where achieving your environmental goals and reducing your costs is our number one aim.
